

I support satellite radio and its right to broadcast user supported material. Satellite radio provides me with consistent high quality broadcasting throughout the U.S. I pay for this service and should have the right to expect complete coverage including traffic and weather reporting without resorting to public radio which may or may not provide me with desired information in a quality format and in a timely manner. It should not be up to the National Association of Broadcasters to determine what is broadcast on satellite radio and I therefore ask you to reject NAB's petition 04-160.
